KA-300 RoofRider Evaporator

The KA-300 is the rooftop air conditioner that all other models are compared to. The KA-300's welded steel construction, extended life permanent magnet motors and high/low pressure system protection ensure a comfortable, cool cab. The KA-300 is recommended for on-highway vehicles where cab space is limited and airflow is not obstructed.

BTU's:

KA-700 SideKick Evaporator

The KA-700 Sidekick is the fleet standard for heavy duty air-conditioning. Features include welded steel construction, 360° adjustable air outlets, easy to reach controls and an extended life permanent magnet motor. The KA-700 easily mounts between the seats and to the backwall of most conventional cabs. Years of proven reliable performance, along with new universal installation kits, make the KA-700 the only choice for true heavy duty applications. Newly redesigned to be even more versatile without sacrificing performance and reliability.

Cabin Filters

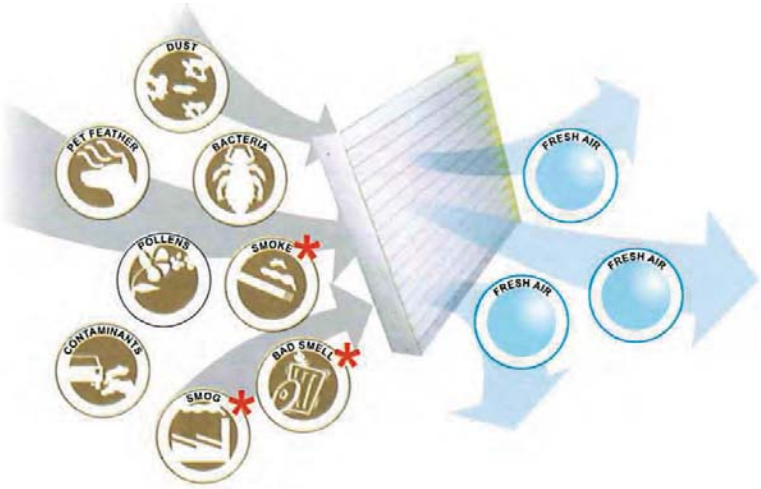

Contact CoolDrive Sales team for more detail on our extensive range of quality Cabin Filters.

Jayair cabin filters are designed to reduce the amount of harmful contaminants entering into your vehicle via the heating, ventilation and air-conditioning system, providing a cleaner and healthier breathing environment for you and your passengers.

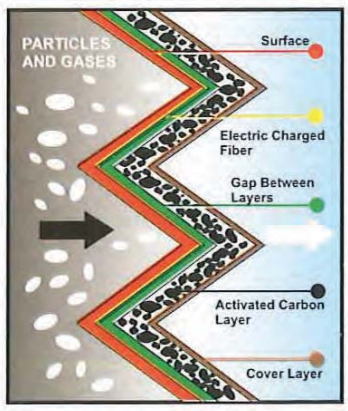

Manufactured from unique non woven materials, cabin filters ensure ambient borne air pollutants such as soot, road dust and other solid particles do not enter your vehicle's cabin.

Carbon activated filters are also available and incorporate a high quality carbon activated layer to absorb airborne gases such as polluted ozone, benzene and unpleasant vehicle emissions.

*** Applies to Carbon Activated only**
